# Regeneracja bieżni poliuretanowych kół i rolek / Regeneration of wheel and roller polyurethane tread.

Oferta ZABI Sp. z o.o. obejmuje regenerację kół i rolek, a także oblewanie poliuretanem detali:

/ Our offer includes wheel and roller regeneration as well as polyurethane-coated elements of:

- z metalu / metal
- z żeliwa / cast iron
- z aluminium / aluminium

W ofercie rolki i koła nietypowe ( wg. dokumentacji dostarczonej przez klienta )  
z bieżnią poliuretanową.

/ We offer untypical wheels and rollers (acording to the client's specification)  
with polyurethane tread.

# Koła i zestawy kołowe ZABI do urządzeń transportowych

Wszystkie modele kół i zestawów kołowych znajdujące się w katalogu produktów ZABI Sp. z o.o. produkowane są zgodnie z normą PN-EN 12526 oraz PN-EN 12530.

Na podstawie badań wytrzymałościowych określono obciążenia użytkowe poszczególnych kół i zestawów kołowych:

- zgodnie z normą PN-EN 12532 – dotyczy wszystkich rodzajów kół
- zgodnie z normą PN-EN 12533 – dotyczy wybranych modeli kół o średnicy od 160mm i łożyskowaniu kulkowym – jest to związane z redukcją nośności (dokładnych informacji udziela dział techniczny).

Badania wykonywane są na urządzeniu do badań dynamicznych z kołowym torem ruchu – wykonanym wg PN-EN 12527 – założenia do badań: max prędkość 4km/h, temperatura otoczenia od +15°C do +28°C, twarda, pozioma bieżnia z przeszkodami o wysokościach: 5% średnicy koła dla kół z bieżnikiem o twardości <90° Shore' A, 2,5% średnicy koła dla kół z bieżnikiem o twardości >90° Shore' A.

## Dobór nośności kół i zestawów kołowych

Nośność koła lub zestawu oblicza się w zależności od rozmieszczenia kół w urządzeniu na podstawie wzoru:

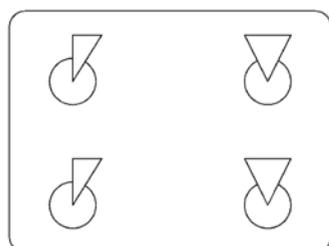

$$N = \frac{U + Q}{B}$$

N - wymagana nośność koła

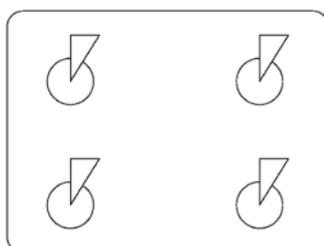

U – masa urządzenia transportowego

Q – ciężar ładunku

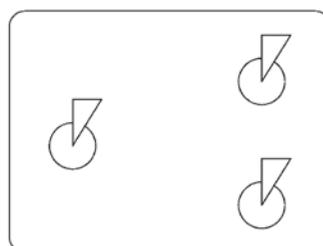

B – współczynnik dobiera się w oparciu o poniższy rysunek

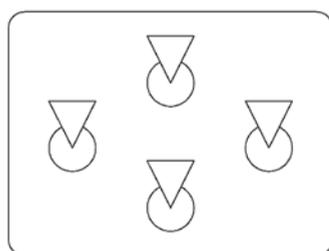

B=3

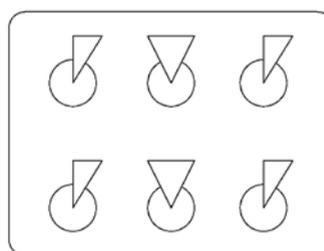

B=3

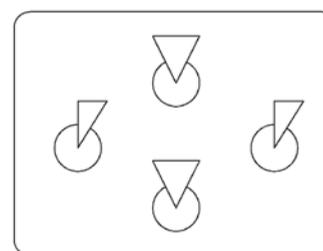

B=3

B=2

B=4

B=3

Przy doborze kół należy zwrócić uwagę na warunki pracy: temperatura, działanie środków chemicznych oraz dotykowe obciążenia (nierówności nawierzchni, wstrząsy, uderzenia).

Dział obsługi klienta oraz przedstawiciele handlowi ZABI Sp. z o.o. pomogą Państwu dobrać najodpowiedniejszy rodzaj kół.

**P** - koło do wózka paletowego /  
pallet truck wheel

**Koła tworzywowe posiadają atest PZH**

**Koła tworzywowe mogą pracować  
w temperaturze od -20°C do +80°C**

**Plastic wheels have PZH certificate**

**Plastic wheels can work in the temperature from -20°C to +80°C**
